Welcome Letter

We would like to take the opportunity of welcoming you as a patient of Unity Health Practice.

The receptionist will have given you, together with this letter, a number of forms which need to be completed for each patient, (alcohol form for over 16's only).

It is important, when completing the purple registration form, that patient's full names are listed, including all middle names. Please note that as of 20/05/20 organ donation law has now changed. If you wish to opt out, you will need to visit www.organdonation.nhs.uk.

Each patient has a unique 10-figure NHS number which you will need to know in order to complete your registration forms. If you do not know your number, you should contact your previous GP surgery who will be able to give it to you.

Please note for all adults (18+) registering with the practice it is helpful for us to see proof of ID and residency, prior to registration. Formal identification documents that we will accept to support your registration are listed below. It is helpful if you can provide one per adult but it is not a requirement if you are unable to provide these. However if you require online access to your medical records then photographic ID will need to be shown.

With regards to children, only an identification document is required ie a birth certificate, to confirm their relationship to the registered patient.

Identity

Birth Certificate **Current Passport** Current EU member state ID card UK photocard driving licence **Current Residence Permit** Benefit / Pensions book Inland Revenue notification **Entry Clearance documents**

Residency

Housing Contract / Rent Book / Tenancy Agreement **Current Council Tax Notification** Bank/building society/mortgage statements UK photocard driving licence Official Inland Revenue document **Work Permit Utility Bills** Insurance company correspondence **Current Residence Permit**

Your registration forms should be completed and returned to the receptionist who will then register you as a permanent patient. This can take up to a week to complete.

Should you need an immediate appointment, you will be asked to register as a 'temporary' patient so that your immediate needs may be met. This will involve the completion of a Temporary Registration Form. You will then be registered permanently with the Practice, once all the forms and documentation have been received and verified. Should you need medication, it is helpful if you have your repeat slip from your previous practice.

We offer new patients the opportunity of a basic new patient health review with one of our nurses, please contact reception if you want to make an appointment.

We hope you will be happy with the treatment and service that you receive from our Practice. We at Unity Health Practice are always striving to improve the service that we provide and look forward to receiving any suggestions for improvement.

Thank you Unity Health

Collecting information about your ethnic group

The 16 ethnic groups used are standard categories for collecting ethnic group information based on the 2001 population census. The list of groups is designed to allow most people to identify themselves; the list is not intended to leave out any groups of people, but to keep the collection of ethnic information simple.

It is important to us that you are able to **describe your own ethnic group**. If you need to complete any of the boxes labeled 'any other group' then please give some details so that we can better understand your needs.

You do not have to complete the question, but providing this information is important. It will help us with diagnosis and assessment of your needs, and it will also help us to plan and improve our service.

The information you provide will be treated as part of your confidential NHS or care notes and will not be shared with any other person or organisation. The NHS and social services have strict standards regarding data protection and your information will be carefully safeguarded.

If you have any concerns or questions regarding this request or you want to make any comments or complaint about the collection of this information or the way in which you have been treated by staff requesting this information please contact the Practice Manager or your local Patient Advice and Liaison Service.

Relationship to patient
Patient Participation Group (PPG)
The Practice is committed to improving the services we provide to our patients. To do this, it is vital that we hear from people about their experiences, views and ideas for making services better. To help us to do this we have established a patient participation group and want to give new patients the opportunity to be part of the PPG.
If you are interested in getting involved in the PPG, please tick yes in the box below and we will contact you with further details.
Yes I am interested in becoming involved in the PPG
Would you like us to pass your email details to our PPG? So they can communicate with you directly

Patient options for sharing information from your Medical Record

Summary Care Record (SCR) and My Care Record

You will automatically be opted 'IN' to the core data sharing options unless you want to be opted 'OUT'. You need to complete this form either if you want to <u>opt out</u> of core summary care record or the local My Care Record or if you want to <u>opt in</u> to additional SCR data.

1. Summary Care Record (SCR) - National Data Sharing

The NHS in England is using a national electronic record called the Summary Care Record (SCR) to support patient care. There are two elements; Core SCR and additional SCR.

- a) Core Summary Care Record is a copy of key information from your GP record medications and allergies only. It provides authorised healthcare staff nationally with faster, secure access to essential information about you when you need unplanned care or when your GP practice is closed to improve the safety and quality of your care.
- b) Additional Data for Summary Care Record. Patients can choose to have additional data uploaded and viewed as part of their Summary Care Record. Approved healthcare staff will be able to see additional key data, such as significant medical history, care plans, patient wishes or preferences as part of your Summary Care Record. This will not be available unless you specifically opt-in to this additional service.

2. My Care Record – Local Data Sharing of Full Medical Record ((Bucks / Oxon / Berks only)

Your patient record is held securely and confidentially on the electronic system at your GP practice. If you require attention from a **local** health and social care professional such as an emergency department, minor injury unit, social worker, or out of hours service, those treating you would be better able to give you appropriate care if some of the information from the GP practice was available to them via My Care Record.

Your permission will be asked before the information is accessed unless the health and social care user is unable to ask you and there is a clinical reason for access (eg you are unconscious).

Please circle your sharing preferences below. Only required if you want to change the automatic settings.

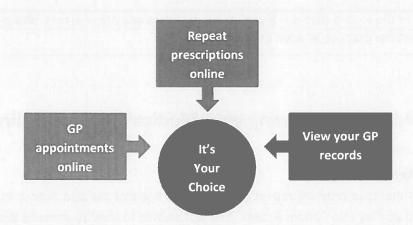

1a)	The Summary Care Record (SCR) – core data only Used nationally across England. Currently only core data uploaded (medications and allergies).	To OPT OUT of the core SCR circle OPT-OUT (9Nd0)
1b)	The Summary Care Record (SCR) – additional data Used nationally across England to enable additional aspects of your medical record to be viewed by authorised users only	To OPT IN to ADDITIONAL DATA UPLOAD circle OPT-IN (9Ndn)
2.	My Care Record Used locally across Buckinghamshire and the immediate surrounding area. All data can be seen in Bucks, Berks and Oxon only but is NOT uploaded from the GP system.	To OPT OUT of the local My Care Record circle OPT-OUT (93C1)

National Data Opt Out

Separate to the Summary Care Record above, your health records (including confidential patient information) are used to help with research and planning. However, you can choose to stop your information being used for this purpose (as well as make a choice for someone else like your children under the age of 13). This will not affect your care and treatment, as your confidential patient information will still be used for this purpose. For more information on how to opt out, go to www.nhs.uk/your-nhs-data-matters/

Patient Online: Records Access Patient information leaflet 'It's your choice'

If you wish to, you can now use the internet to book appointments with a GP, request repeat prescriptions for any medications you take regularly and look at your medical record online. You can also still use the surgery for any of these services as well. It's your choice.

Being able to see your record online might help you to manage your medical conditions. It also means that you can even access it from anywhere in the world should you require medical treatment on holiday. If you decide not to join or wish to withdraw, this is your choice and practice staff will continue to treat you in the same way as before.

You will be given login details, so you will need to think of a password which is unique to you. This will ensure that only you are able to access your record – unless you choose to share your details with a family member or carer. It will be your responsibility to keep your login details and password safe and secure. If you know or suspect that your record has been accessed by someone that you have not agreed should see it, then you should change your password immediately. If you print out any information from your record, it is also your responsibility to keep this secure.

Before you apply for online access to your record, there are some other things to consider

Although the chances of any of these things happening are very small, you will be asked that you have read and understood the following before you are given login details.

Forgotten history

There may be something you have forgotten about in your record that you might find upsetting.

Abnormal results or bad news

If your GP has given you access to test results or letters, you may see something that you find upsetting to you. This may occur before you have spoken to your doctor or while the surgery is closed and you cannot contact them.

Choosing to share your information with someone

It's up to you whether or not you share your information with others – perhaps family members or carers. It's your choice, but also your responsibility to keep the information safe and secure.

Coercion

If you think you may be pressured into revealing details from your patient record to someone else against your will, it is best that you do not register for access at this time.

Misunderstood information

Your medical record is designed to be used by clinical professionals to ensure that you receive the best possible care. Some of the information within your medical record may be highly technical, written by specialists and not easily understood. If you require further clarification, please contact the surgery for a clearer explanation.

Information about someone else

If you spot something in the record that is not about you or notice any other errors, please log out of the system immediately and contact the practice as soon as possible.

Guidance on Viewing your Medical Records Online

Accessing your Medical Record on line

If you are booking appointments or ordering repeat medication on line you can also choose to see other aspects of your medical record when you log into Patient Access. You will be able to view your medications, any allergies that are recorded in your medical record, your immunisations; and your test results. As results are very individual to each person and what is deemed abnormal for some patients could actually be normal for others, we felt it would be helpful to provide a guide on what the test results module looks like and what it means to patients.

Below is a screen shot of a Test Results page and an explanation of what can be seen when you view your results and how your GP will communicate the result findings with you.

NB: You will need to visit your GP surgery to complete a consent form provide ID, and received passwords to access your Patient Access account.

Blood Tests and Results- What do they mean?

Laboratory tests are tools helpful in evaluating the health status of an individual. It is important to realise that laboratory results may be outside of the so-called "normal range" for many reasons.

These variations may be due to such things as race, dietary preference, age, sex, menstrual cycle, degree of physical activity, problems with collection and/or handling of the specimen, non-prescription (over the counter) drugs (aspirin, cold medications, vitamins, etc.), prescription drugs, alcohol intake and a number of non-illness-related factors.

Any unusual or abnormal results should be discussed with the clinician who ordered the test. Generally diseases or problems are not diagnosed or treated with a blood test alone. It can, however, help you to learn more about your body and detect potential problems in the early stages when treatment or changes in personal habits can be most effective.

How to access your test results:

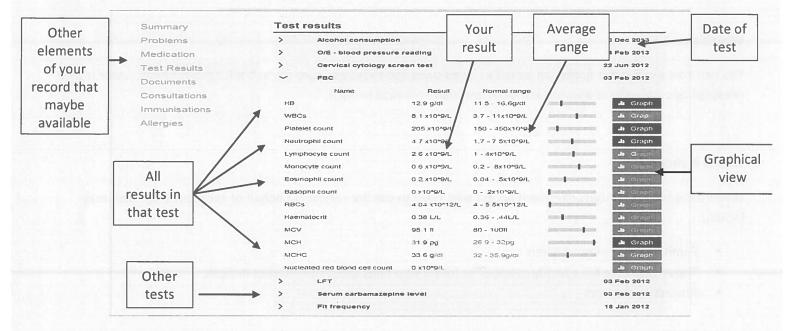

Visit your practice website or https://patient.emisaccess.co.uk/Account/Login

Sign in using your **user ID and password** (you must have previously registered at your GP Surgery to sign in to this service)

Click on Medical Record (if this is not visible you will need to contact your GP Surgery)

Test Results you will see in the summary page. Click on the test result to view the results and comments.

Below is a screen shot of what you can expect to see when you access 'Test results' via Patient Access

You may notice occasional results fall outside of the normal average range for that test. Sometimes a result that is outside of the normal average range is not concerning. For example it may be normal for you.

Your doctor will leave a comment about your results and any actions that may be required. If the GP is concerned about any result they will call you or send you a letter.

What the doctor's comments mean

Satisfactory – **no action** This means that the doctor has looked at the result and deemed it to be within or close to the normal range for the test and the result is not concerning. Some patients have consistently abnormal results that are "normal" for them.

Doctor to discuss result with patient by phone, not urgent - This means that the doctor wishes to speak to you in order to explain the result

Make appointment to see doctor, not urgent - This is similar to the above but the doctor wishes to explain the result(s) face to face as detailed explanations and/or further treatment or investigation(s) may be necessary.

Discuss result with doctor urgently – If you have not already heard from the doctor please contact the surgery urgently.

Infection confirmed, on correct antibiotic/antifungal - Self-explanatory.

Continue on current medication - No reason to change current treatment according to test result(s).

Review in diabetic clinic - Used for diabetic patients who will have their results discussed during their next clinic review.

Improving – Patient will be contacted directly if any action is required.

Repeat test – Practice will contact you in due course to arrange

See PN – Internal Practice Note; practice will contact you directly if required.

Health check clinic result – You will be informed directly if any action is required

Hospital ordered test - call hospital for result

Proxy access now available

What's new?

You can now use Patient Access on behalf of loved ones and those you care for to book appointments, order repeat prescriptions and, where appropriate, view and share medical records.

Who is it aimed at?

This is designed for all users of Patient access who need to use the service on behalf of someone else. This may include:

- Families with young children
- Those who care for a family member or friend who finds using the internet difficult
- Professional carers

How do I access this feature?

To use Patient Access on behalf of your loved ones or dependents, you must request access via your GP.

For children under 11 years of age a parent/guardian can request access through the surgery and there is no need for the child to co sign the form. The access will be switched off on the child's 11th birthday (reminders will be sent 3 months prior). The proxy will need to bring in ID with them.

For children 11-16 the parent/guardian can continue with proxy access but both the child and proxy must come into the surgery and sign the form in front of reception and bring ID. If the child wishes their own online account then this will be sent to the GP for approval. Also if the child declines the proxy access but the parent/guardians feels it would be in the patient's best interest to continue then this will go to the GP for review and a decision made. The proxy can have their own account if they are deemed competent to make decisions. Proxy access will turn off on the child's 16th birthday (reminders will be sent 3 months prior).

Patients over 16 can grant proxy access to a carer/relative/friend on their behalf. Both the patient and the proxy will need to bring ID into the surgery and sign forms giving explicit consent for the proxy to manage the patient's online access.

If you are an existing online user then the next time you log into your account you will automatically be linked to the proxy account (under linked users).

If not an existing online user already then once you register you will then have access the linked patient at the point registration is complete.

The form included in this pack is to request access to your own medical records. For proxy access please ask reception for a form.

The practice has the right to remove online access to services for anyone that does not use them responsibly.
